

A FULL SERVICE FOR SPECIALIST VEHICLE CUSTOMERS

At Energy Solutions we pride ourselves on designing and supplying leading edge power and monitoring systems for the vehicle markets.

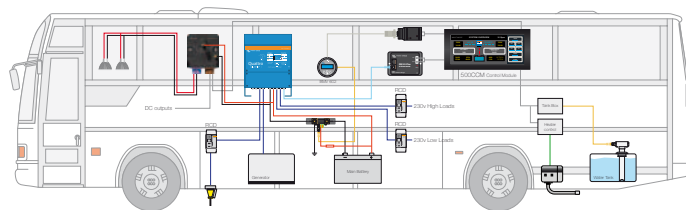

Design and Engineering Consultancy

We have an in-house development team and project engineers working exclusively on specialist vehicle applications. They work directly with each customer to create bespoke solutions to their requirements - from initial design stages, to specification and through to manufacture, test and installation.

Schematics

For each project we provide you with schematics and documentation to help with installation and ongoing maintenance.

Increased product range

We can supply a full range of power products from the basics up to the latest in touchscreen panels and multiplexing power systems.

- Inverters
- Chargers
- Inverter/chargers
- Batteries
- Split charge relays
- Battery monitoring
- Lighting Systems
- Touchscreen Panels
- Multiplexing Power Systems
- Remote battery monitoring
- Tank monitoring
- Mains Power Systems & Cord Sets

Set us a challenge - We would be delighted to show you how our latest product and services enhancements can help your projects. Just email us on the link below and we will be in touch to discuss how we can help.

Experienced across:

- Luxury & Tour Coach & Bus operators
- Horse Boxes
- Communications Vehicles
- Emergency Services

Our services allow a range of leisure, business & essential services to be run from vehicles with no loss in performance.

NEW Service - Wiring looms

We are now able to offer vehicle clients the benefits of our own in-house wiring loom design and manufacturing service. Our service includes specification, design, test and manufacture. By using us a subcontracted, automated manufacturer you can reduce your own in-house manufacturing and installation costs.
