

Type K Thermocouple 10 Metre Extension Cable Kit PN 4529

In this package

1 x 10 metre Type K thermocouple Extension Cable
1 x Type K thermocouple extension Plug
1 x Type K thermocouple extension socket
These Instructions

Installation

Type K thermocouple cables can be extended by up to 10 metres by using this kit which contains Type K thermocouple extension cable.

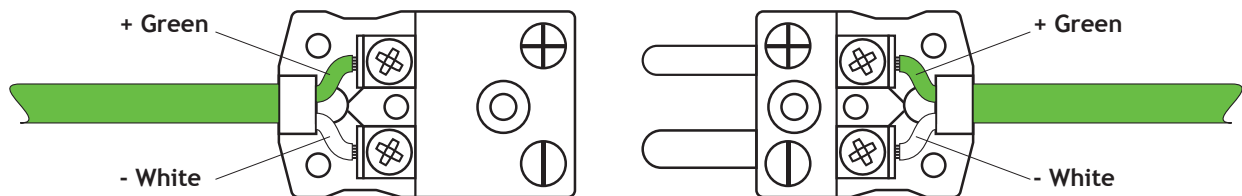

Thermocouples CANNOT be extended with any other type of cable as that will render them useless.

The connection between the existing thermocouple cable and the extension cable MUST be made using the green type K thermocouple plug and socket included in this kit.

The inner green wire of the type K thermocouple wire should always be attached to the smaller + contact on the plug and the socket.

The inner white wire of the type K thermocouple wire should always be attached to the larger - contact on the plug and socket.

If these connections are reversed the thermocouple will not work.
